

Abstract

There are disclosed:

(1) a laminated film comprising:

(i) a resin layer (A) containing an acrylic resin, and

(ii) a resin layer (B) containing a resin composition,

which composition comprises:

(a) 10 to 98% by weight of a propylene polymer,

(b) 1 to 60% by weight of an inorganic filler, and

(c) 1 to 60% by weight of a thermoplastic elastomer;

(2) a structure comprising the laminated film and a substrate containing a polyolefin resin; and

(3) a process for producing the structure.
